

TUBAU: S&T Slovakia implements mySAP All-in-One

The customer

TUBAU a.s. is a Žilina-based construction company which was established as a joint venture between MARTI TunnelBau AG Switzerland and DANICON a.s. Slovensko. In addition to the core business of underground construction, such as road tunnels, underground water plant facilities and water feeders for large-scale underground constructions, the company also carries out foundation construction using drilled large-diameter piles and micropiles. Further elements of the TUBAU portfolio include construction of underground sealing walls for foundation pit excavation and securing of slopes. Its newest division focuses on sewerage and water supply systems. The company has a total of 500 employees.

The challenge

The implementation of mySAP All-in-One was completed very quickly – it took just three months. A classic implementation was carried out for TUBAU (e.g. SAP Business Suite) in view of the requested complex analysis of corporate requirements and the subsequent system setup covering the key business processes, in particular in the area of logistics.

The project

The project was implemented within all the agreed time and quality parameters and the resulting customer satisfaction has led to an outsourcing contract also being awarded to S&T. The project itself consisted of implementing the following mySAP All-in-One version ERP 2005 ECC 6.0 modules: base, finance, logistics and work-flow. The next stage of the project envisages expansion of the information system to cover budgeting.

The quality of work provided by S&T Slovakia's experts impressed the management of TUBAU and led to the signing of a contract for outsourcing the corporate system management. TUBAU thus became yet another company to entrust its ERP system to S&T Slovakia. TUBAU can now fully focus on its core business and enjoy all the benefits offered by the outsourcing model: besides S&T managing the infrastructure on which the system is running, the operating system, the databases and mySAP All-in-One, as well as performing maintenance on individual modules, TUBAU will also automatically receive all patches, updates and any necessary development of special tools for the system environment.

Benefit for the customer

- improvement of business processes and online information availability
- operative and financial evaluation of individual projects and contracts
- logistics have become more precise and simple with regard to production requirements
- management of key workflow processes

“After deploying mySAP All-in-One, the quality of our business processes rose significantly, as did the quality and preciseness of the information used for decision-making and operative and financial evaluation of individual projects and contracts. With regard to production, our logistics processes have become much more transparent and efficient.”

Vierka Palanová, Financial Director TUBAU a.s.

S&T Slovakia

S&T Slovakia was founded in 1993 and is today one of the most important suppliers of integrated solutions in the area of information technologies in Slovakia. The company provides its customers with IT solutions including analysis of their needs, creation of strategy, delivery and implementation of technologies, consulting services, training, service and project funding. In 2005, S&T took over SAP specialist company VARIAS, which has a focus on system integration and implementation of SAP R/3 information systems and mySAP Business Suite solutions. S&T Slovakia currently has around 158 employees in four cities, Bratislava, Žilina, Banská Bystrica and Košice.

S&T Slovakia belongs to the S&T Group, which, with about 3,000 employees in 21 countries and annual sales in 2008 of 513,4 million Euro, is the leading provider of IT consultancy, solutions and services for customers in Central and Eastern Europe, in the Germany-Austria-Switzerland (DACH) region and in China and Japan.
