

KABEG: S&T Austria replaces server landscape

The customer

Based in Austria in the state of Kärnten, KABEG manages regional hospitals and, with around 6,300 employees, is Kärnten's biggest employer. KABEG is responsible for the administration, control and dynamic development of Klagenfurt, Villach, Wolfsberg, Laas regional hospitals and the Gailtal Clinic.

The challenge

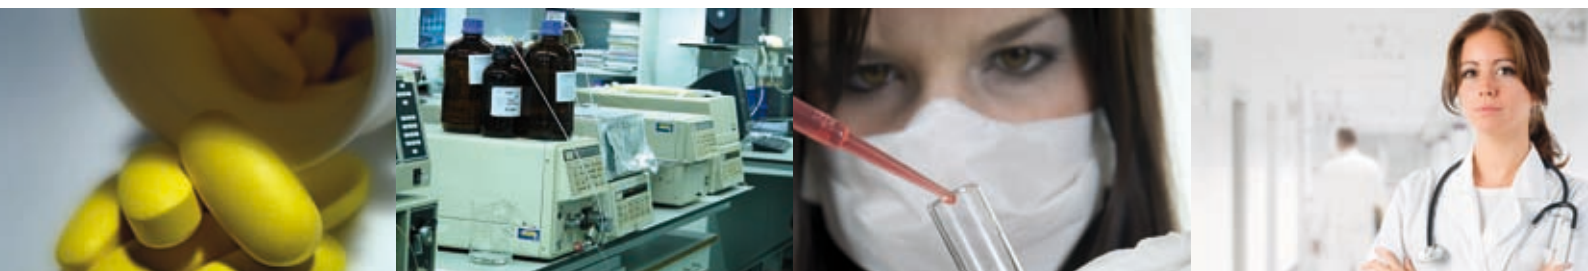

KABEG planned to transfer everything from their existing servers to the new C-class system, to be up-to-date for the next few years. The new system will also take up less space, reduce the air-conditioning as well as power costs. Five years ago S&T Austria installed already all the current servers of KABEG. Therefore they decided once again for S&T.

The project

59 servers (57 in Klagenfurt, two in Wolfsberg) will be installed by S&T Austria in the first phase. Then comes roll-out of the VM-ware using HP's Rapid Deployment tool, migrating and consolidating strategic platforms such as Exchange, SQL, Citrix, File and Print Services, SMS etc to the new hardware. The new System Center Configuration Manager 2007 (formerly SMS V4) will be installed for PC deployment and the installation roadmap. This will form the strategic platform for all devices, for rolling out software and/or patches in a structured manner and for maintaining current status. Furthermore S&T Austria will take over hardware maintenance and maintenance of the Microsoft platforms for the next five years.

Benefit to the customer

- cost reduction
- more flexibility
- hardware maintenance and maintenance of the Microsoft platforms by S&T

"Five years ago S&T helped us install all our current servers. Now we are transferring everything to the new C-class system, which we will run for the next few years and which will also take up less space, reducing our air-conditioning and power costs."

Josef Walgram, IT Infrastructure Manager for KABEG

S&T DACH

With around 800 employees, S&T DACH is one of the largest providers of IT consulting, solutions and services in German-speaking Europe. Bringing S&T Austria together with German, Austrian and Swiss sections of the former IMG concern, which was taken over by S&T in early 2007, to form a single organization bundles the strengths of both parts of the company. S&T DACH is targeting upper mid-sized customers in Germany, Austria and Switzerland, presenting itself as a one-stop IT shop. From management consulting and the optimization of sector-specific business processes based mainly on SAP through to operation and infrastructure optimization, S&T DACH covers the whole spectrum of IT services. S&T DACH is a part of the S&T Group, which, with around 3,150 employees in 22 countries and an preliminary annual turnover in 2007 of 524 million Euro, is the leading provider of IT consultancy, solutions and services for customers in Central and Eastern Europe, in the Germany-Austria-Switzerland (DACH) region and in China and Japan.
